24 packages. 6 tabs. Almost every field required.

How do you mark the required fields?

A. Star every required field

B. Mark only the optional ones

C. Mark nothing

Pick one before you swipe.

B. When nearly everything is starred, the star says nothing.

What else WPOS did on this rebuild

- An Optional chip on the exceptions, not stars everywhere
- 8 pricing models checked against the source: all matched
- 2 CSS bugs caught in its own sticky order bar
- 0 charges: the Stripe keys are deliberately absent
