

Can you spot the **AI** in this WordPress admin?

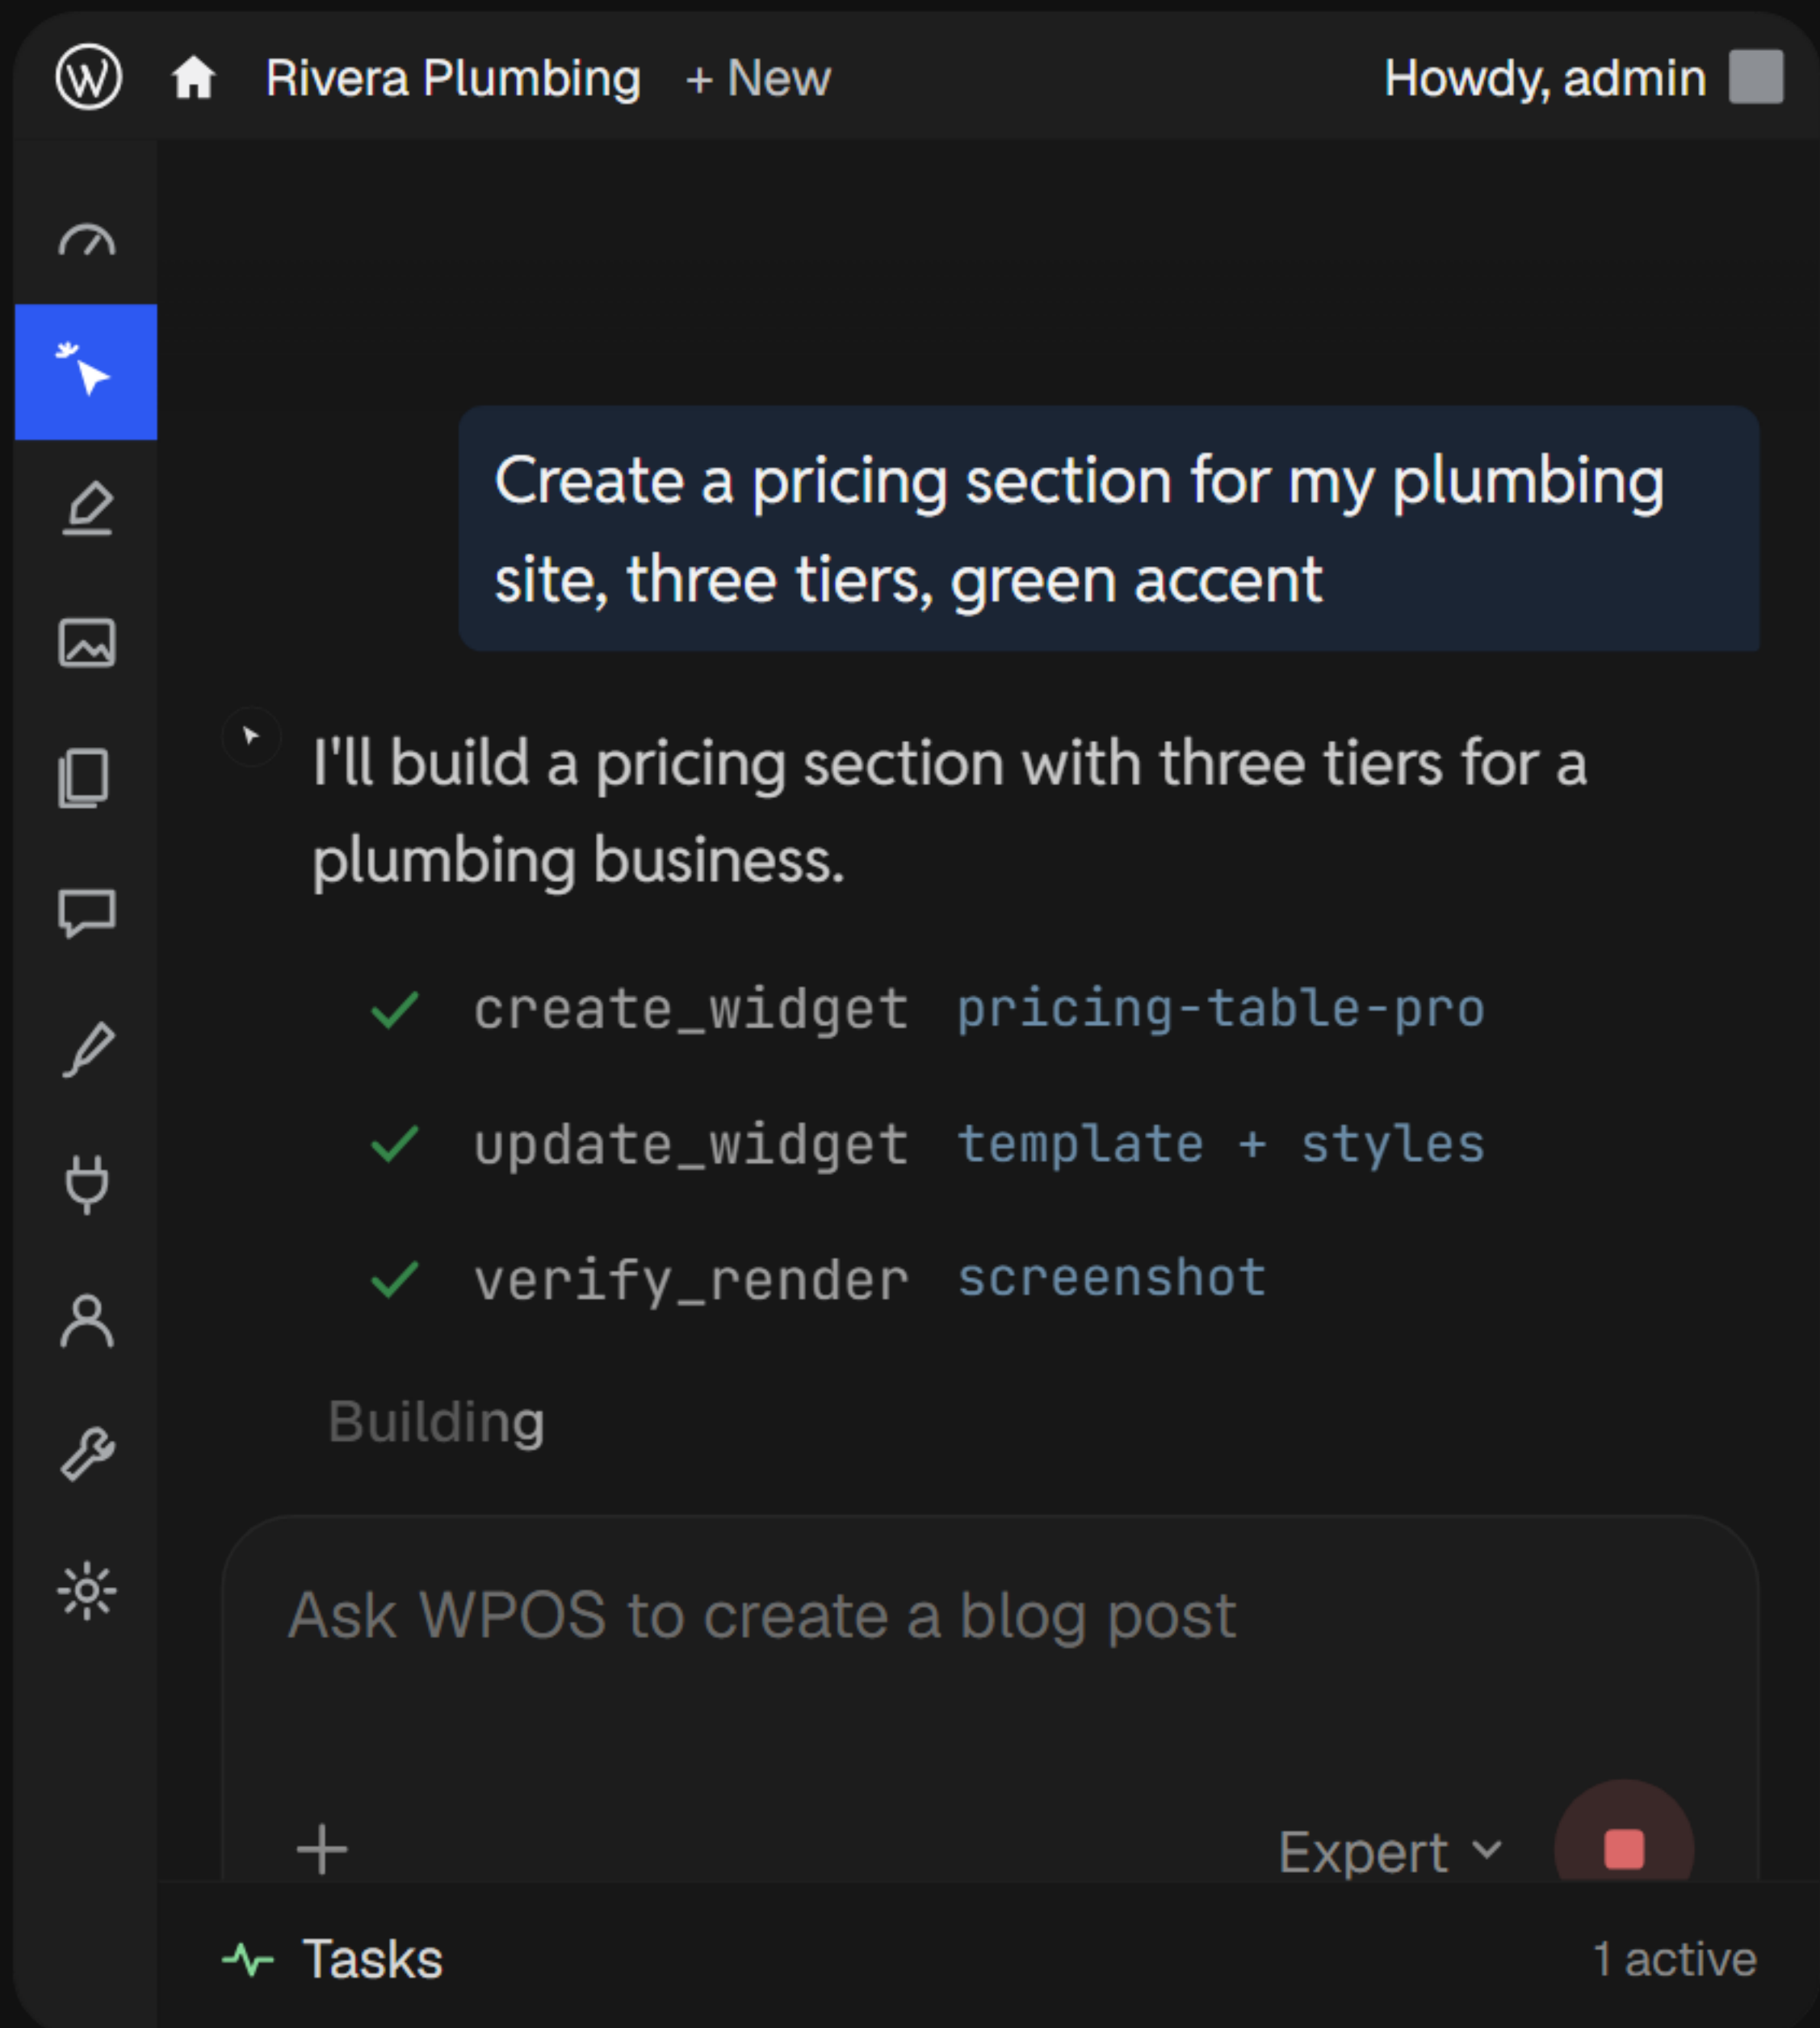

Right here. A **plugin** called **WPOS AI**.

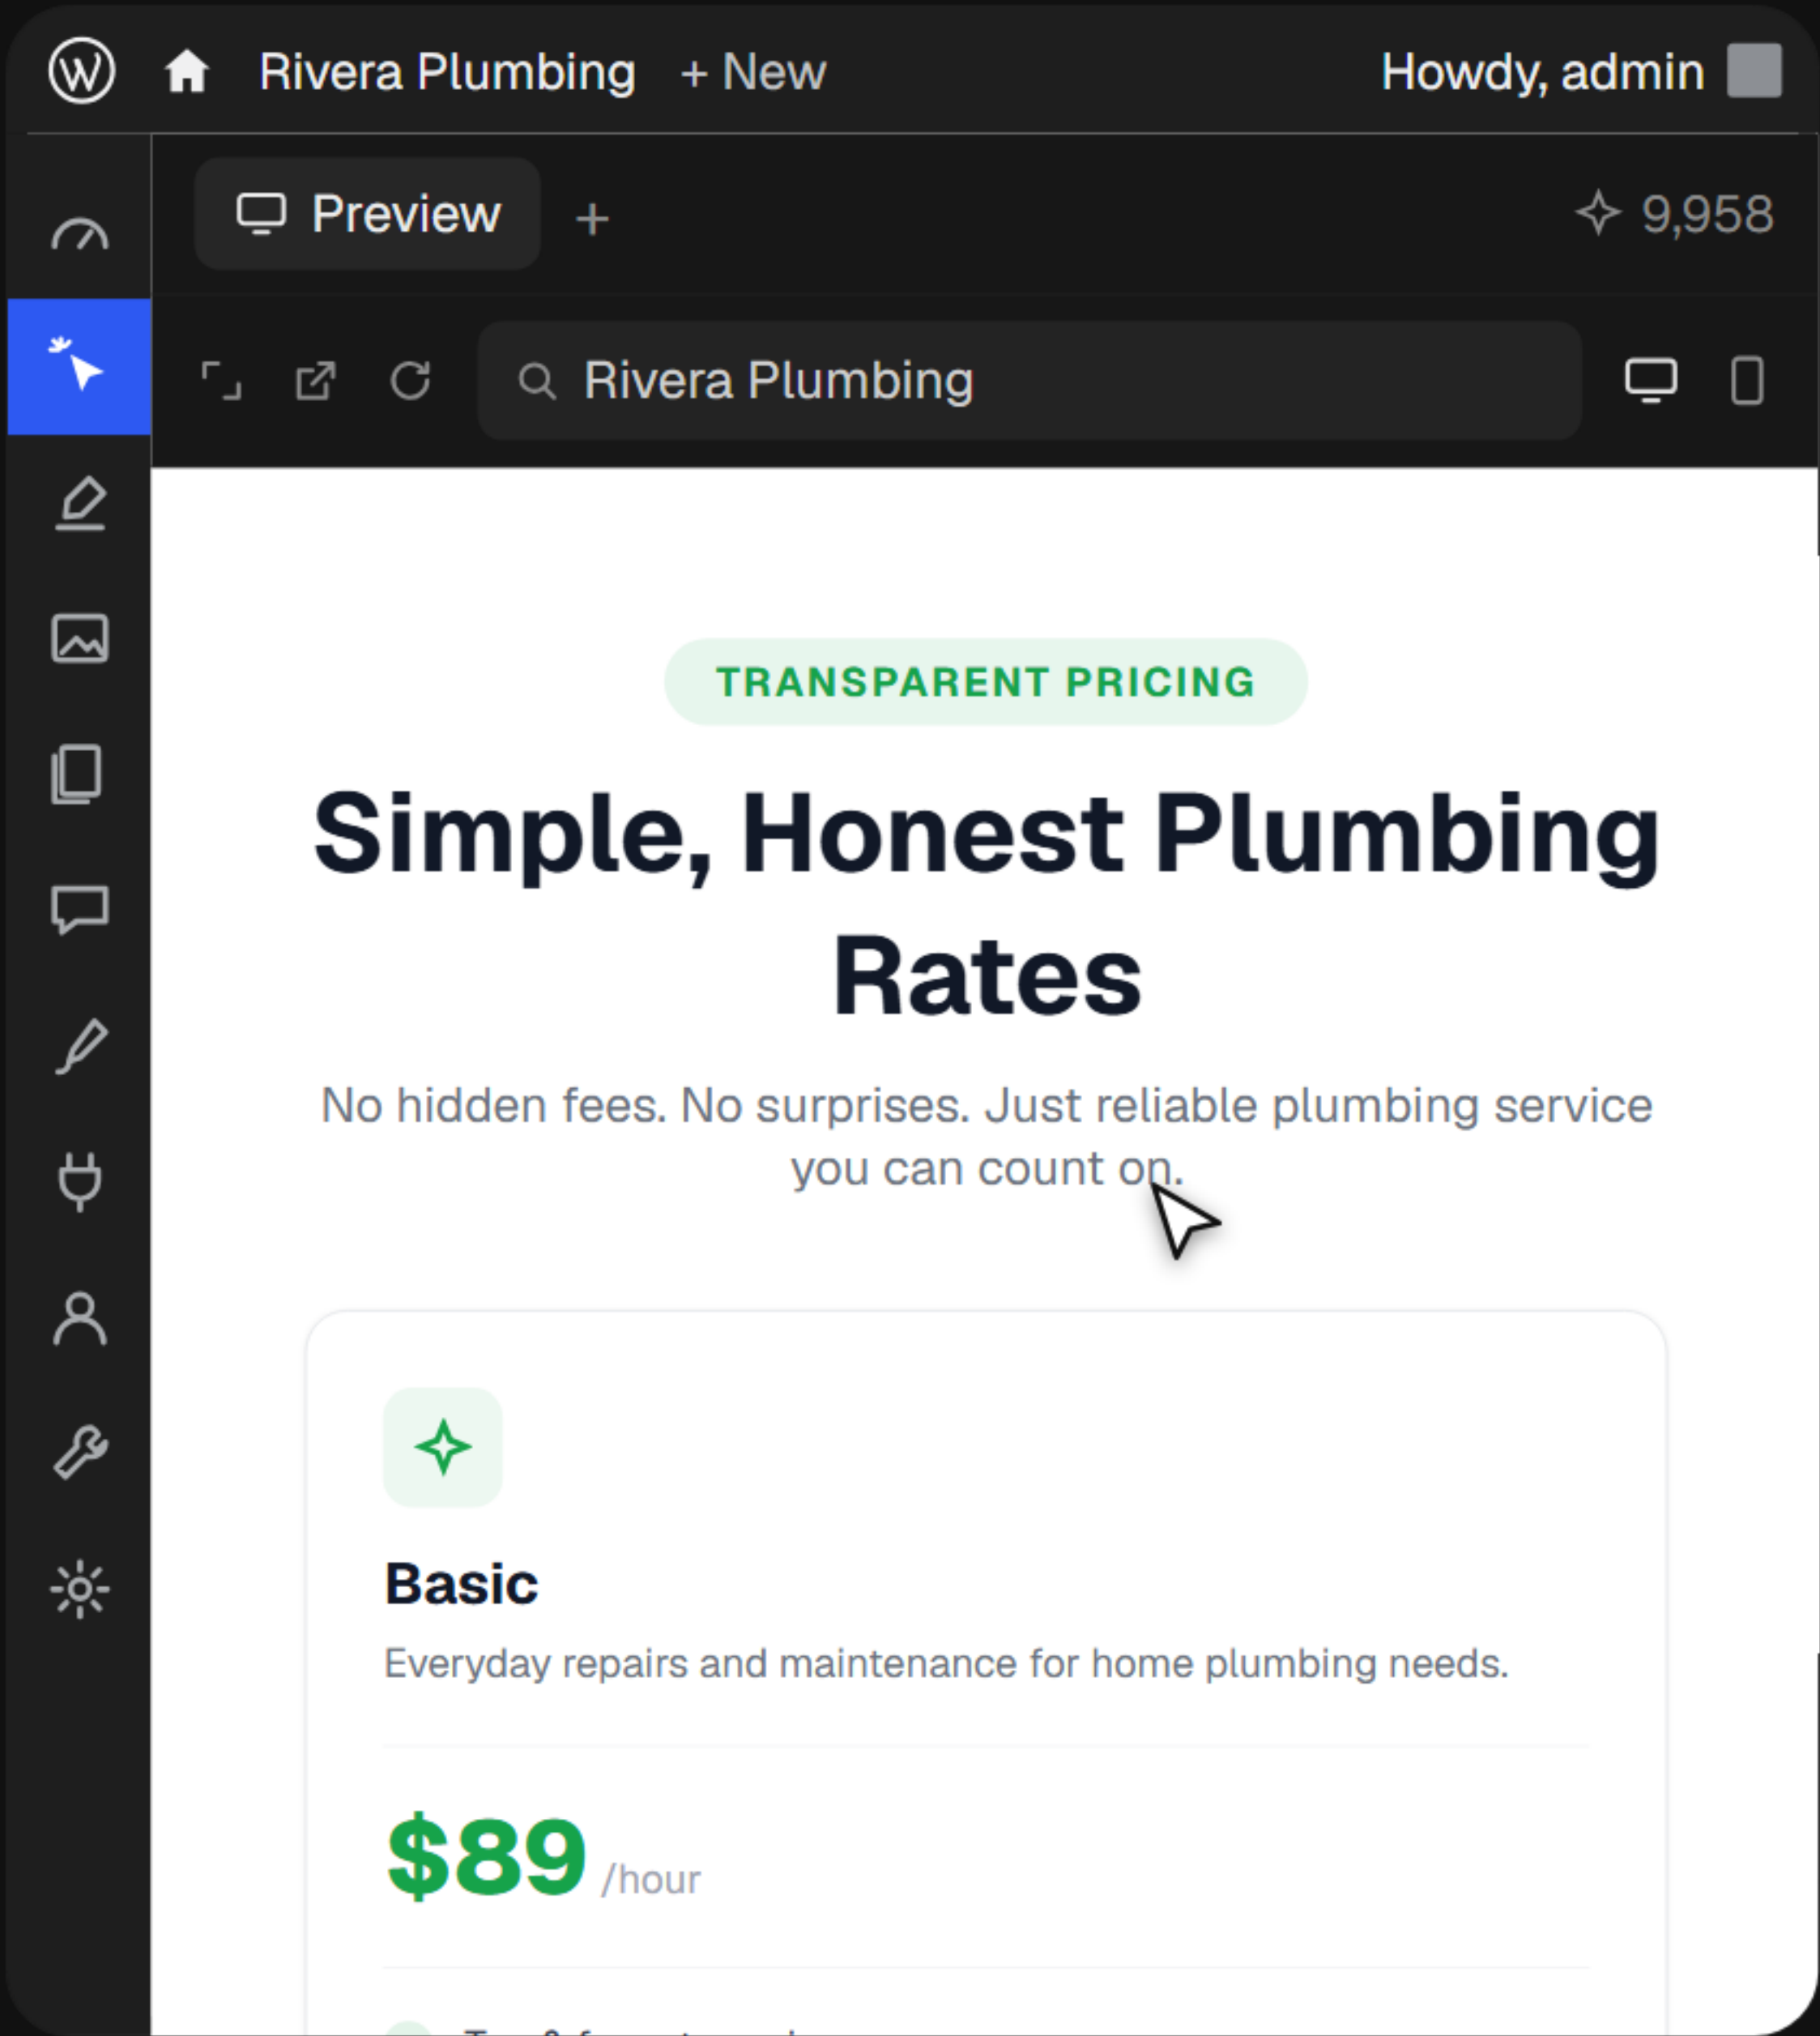

1. You **type** what you need, in plain words.

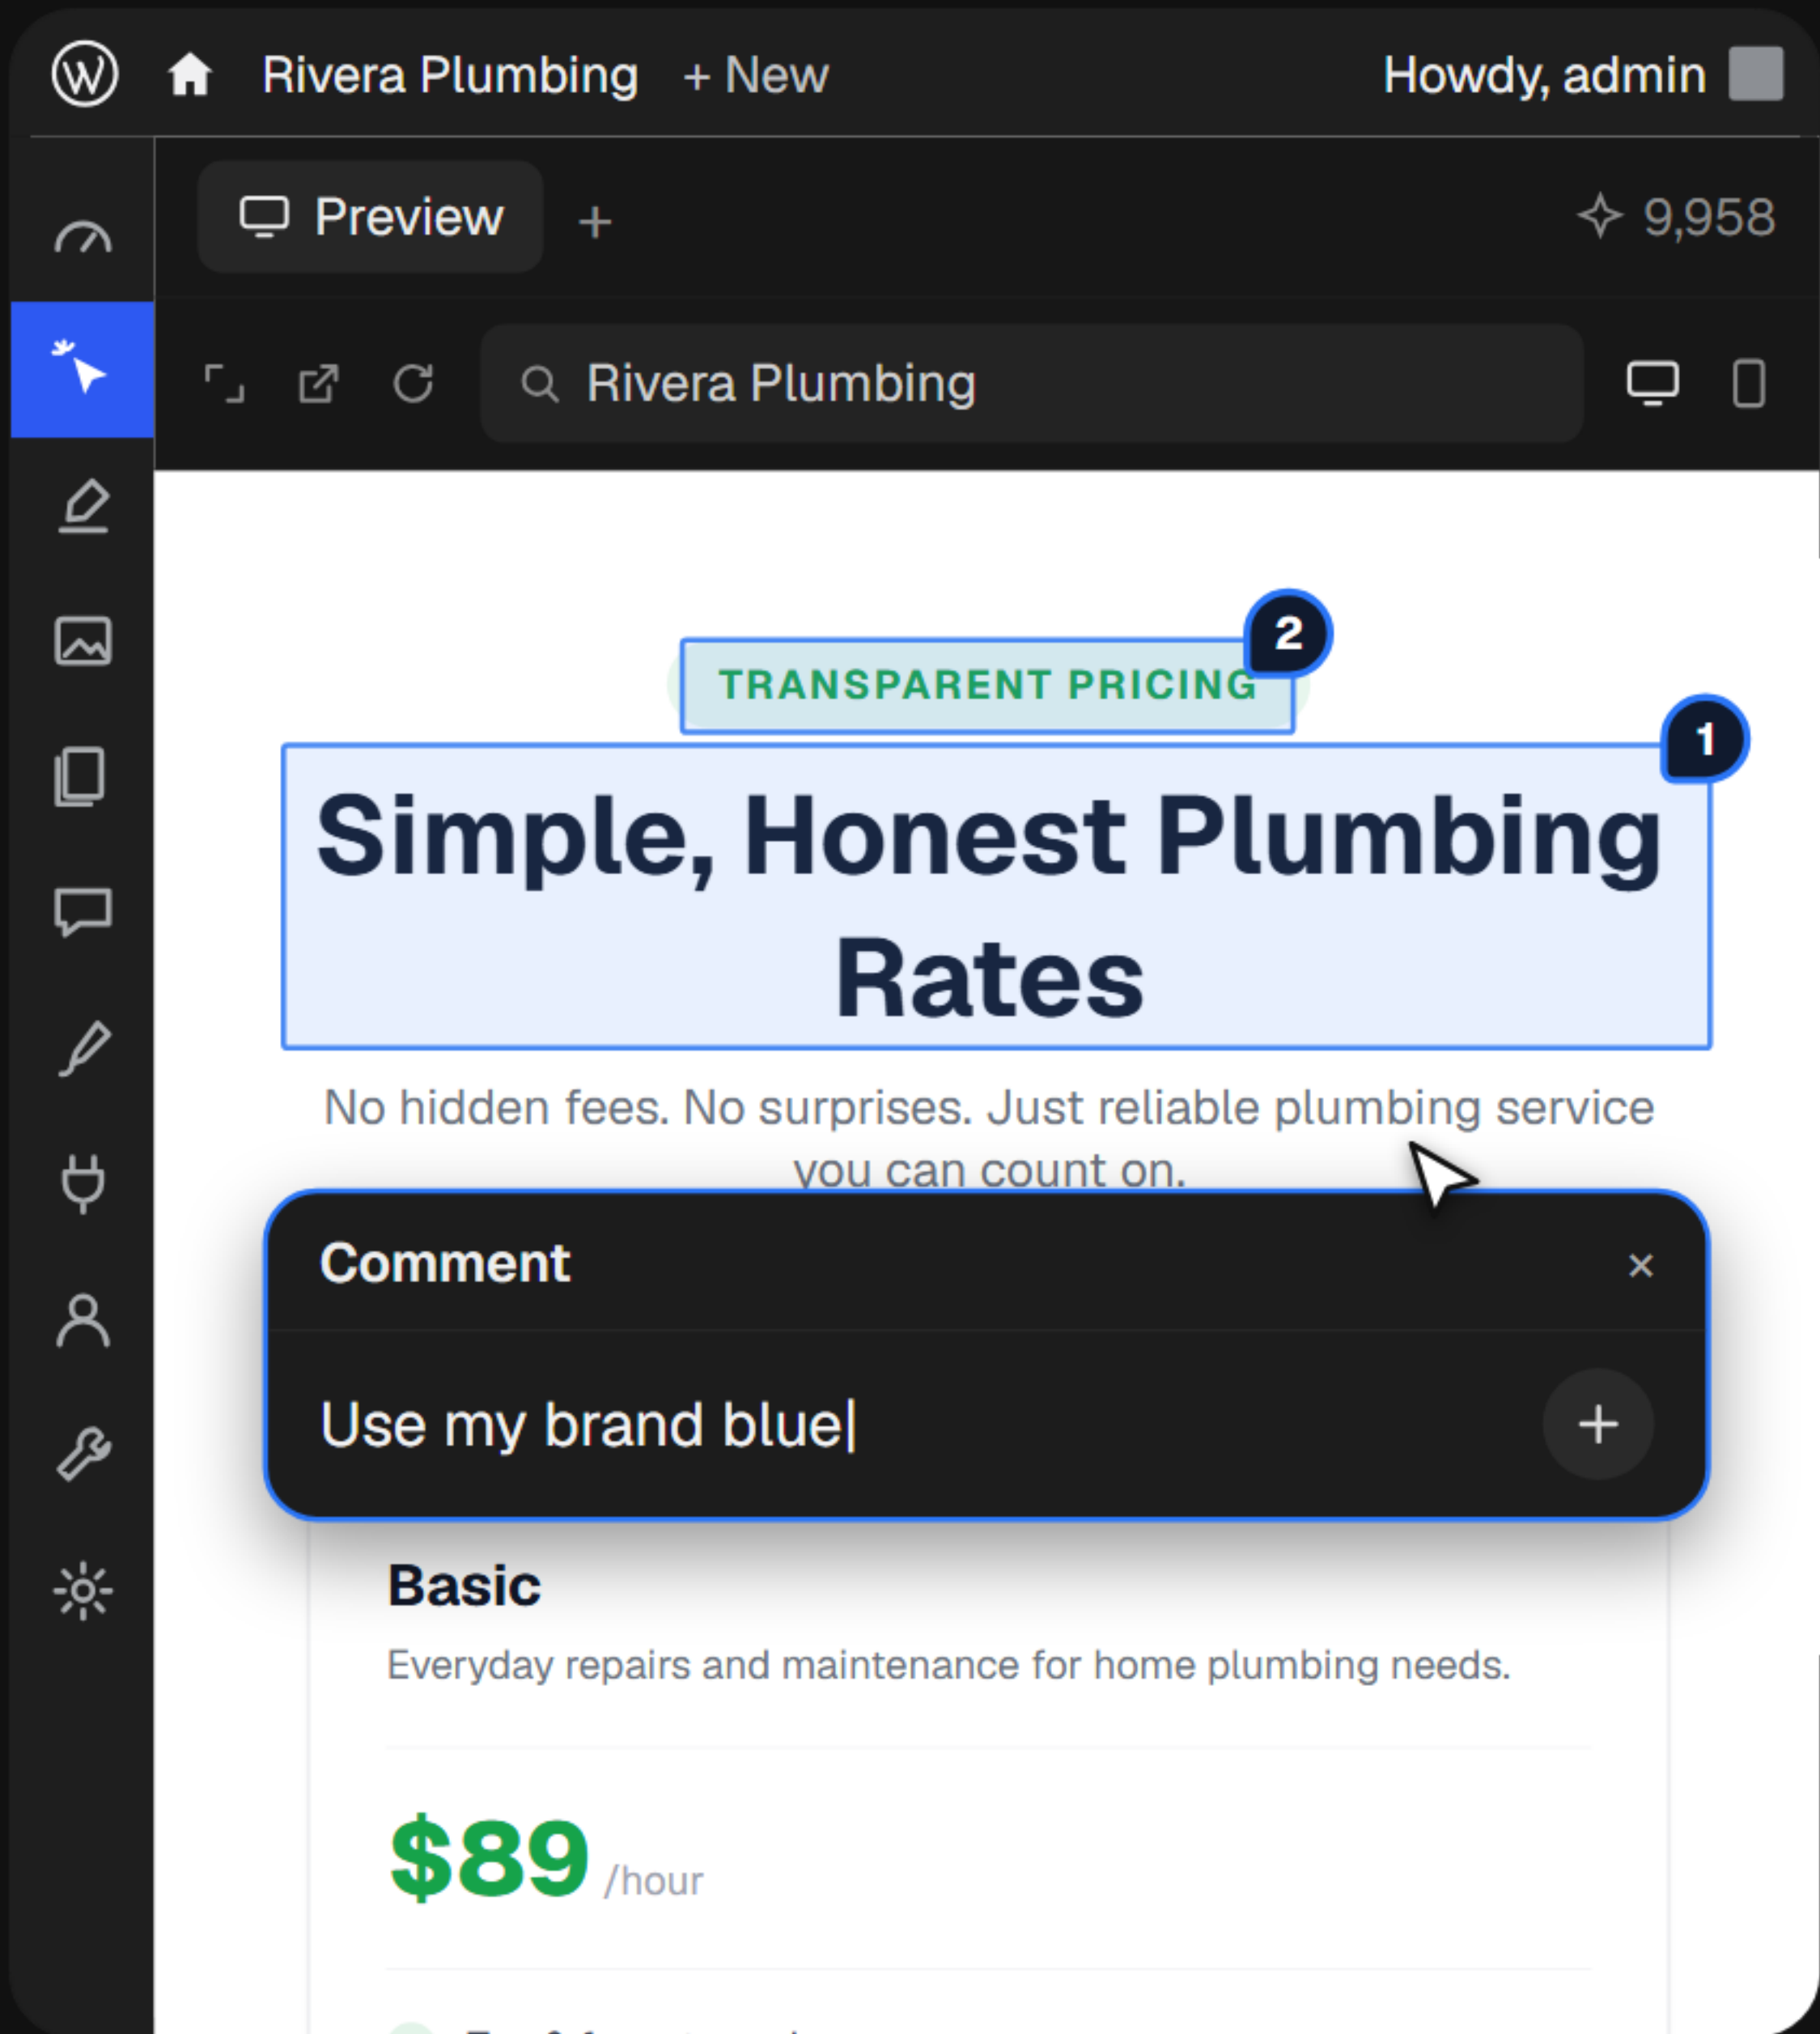

2. It **builds** it inside WordPress, then checks it.

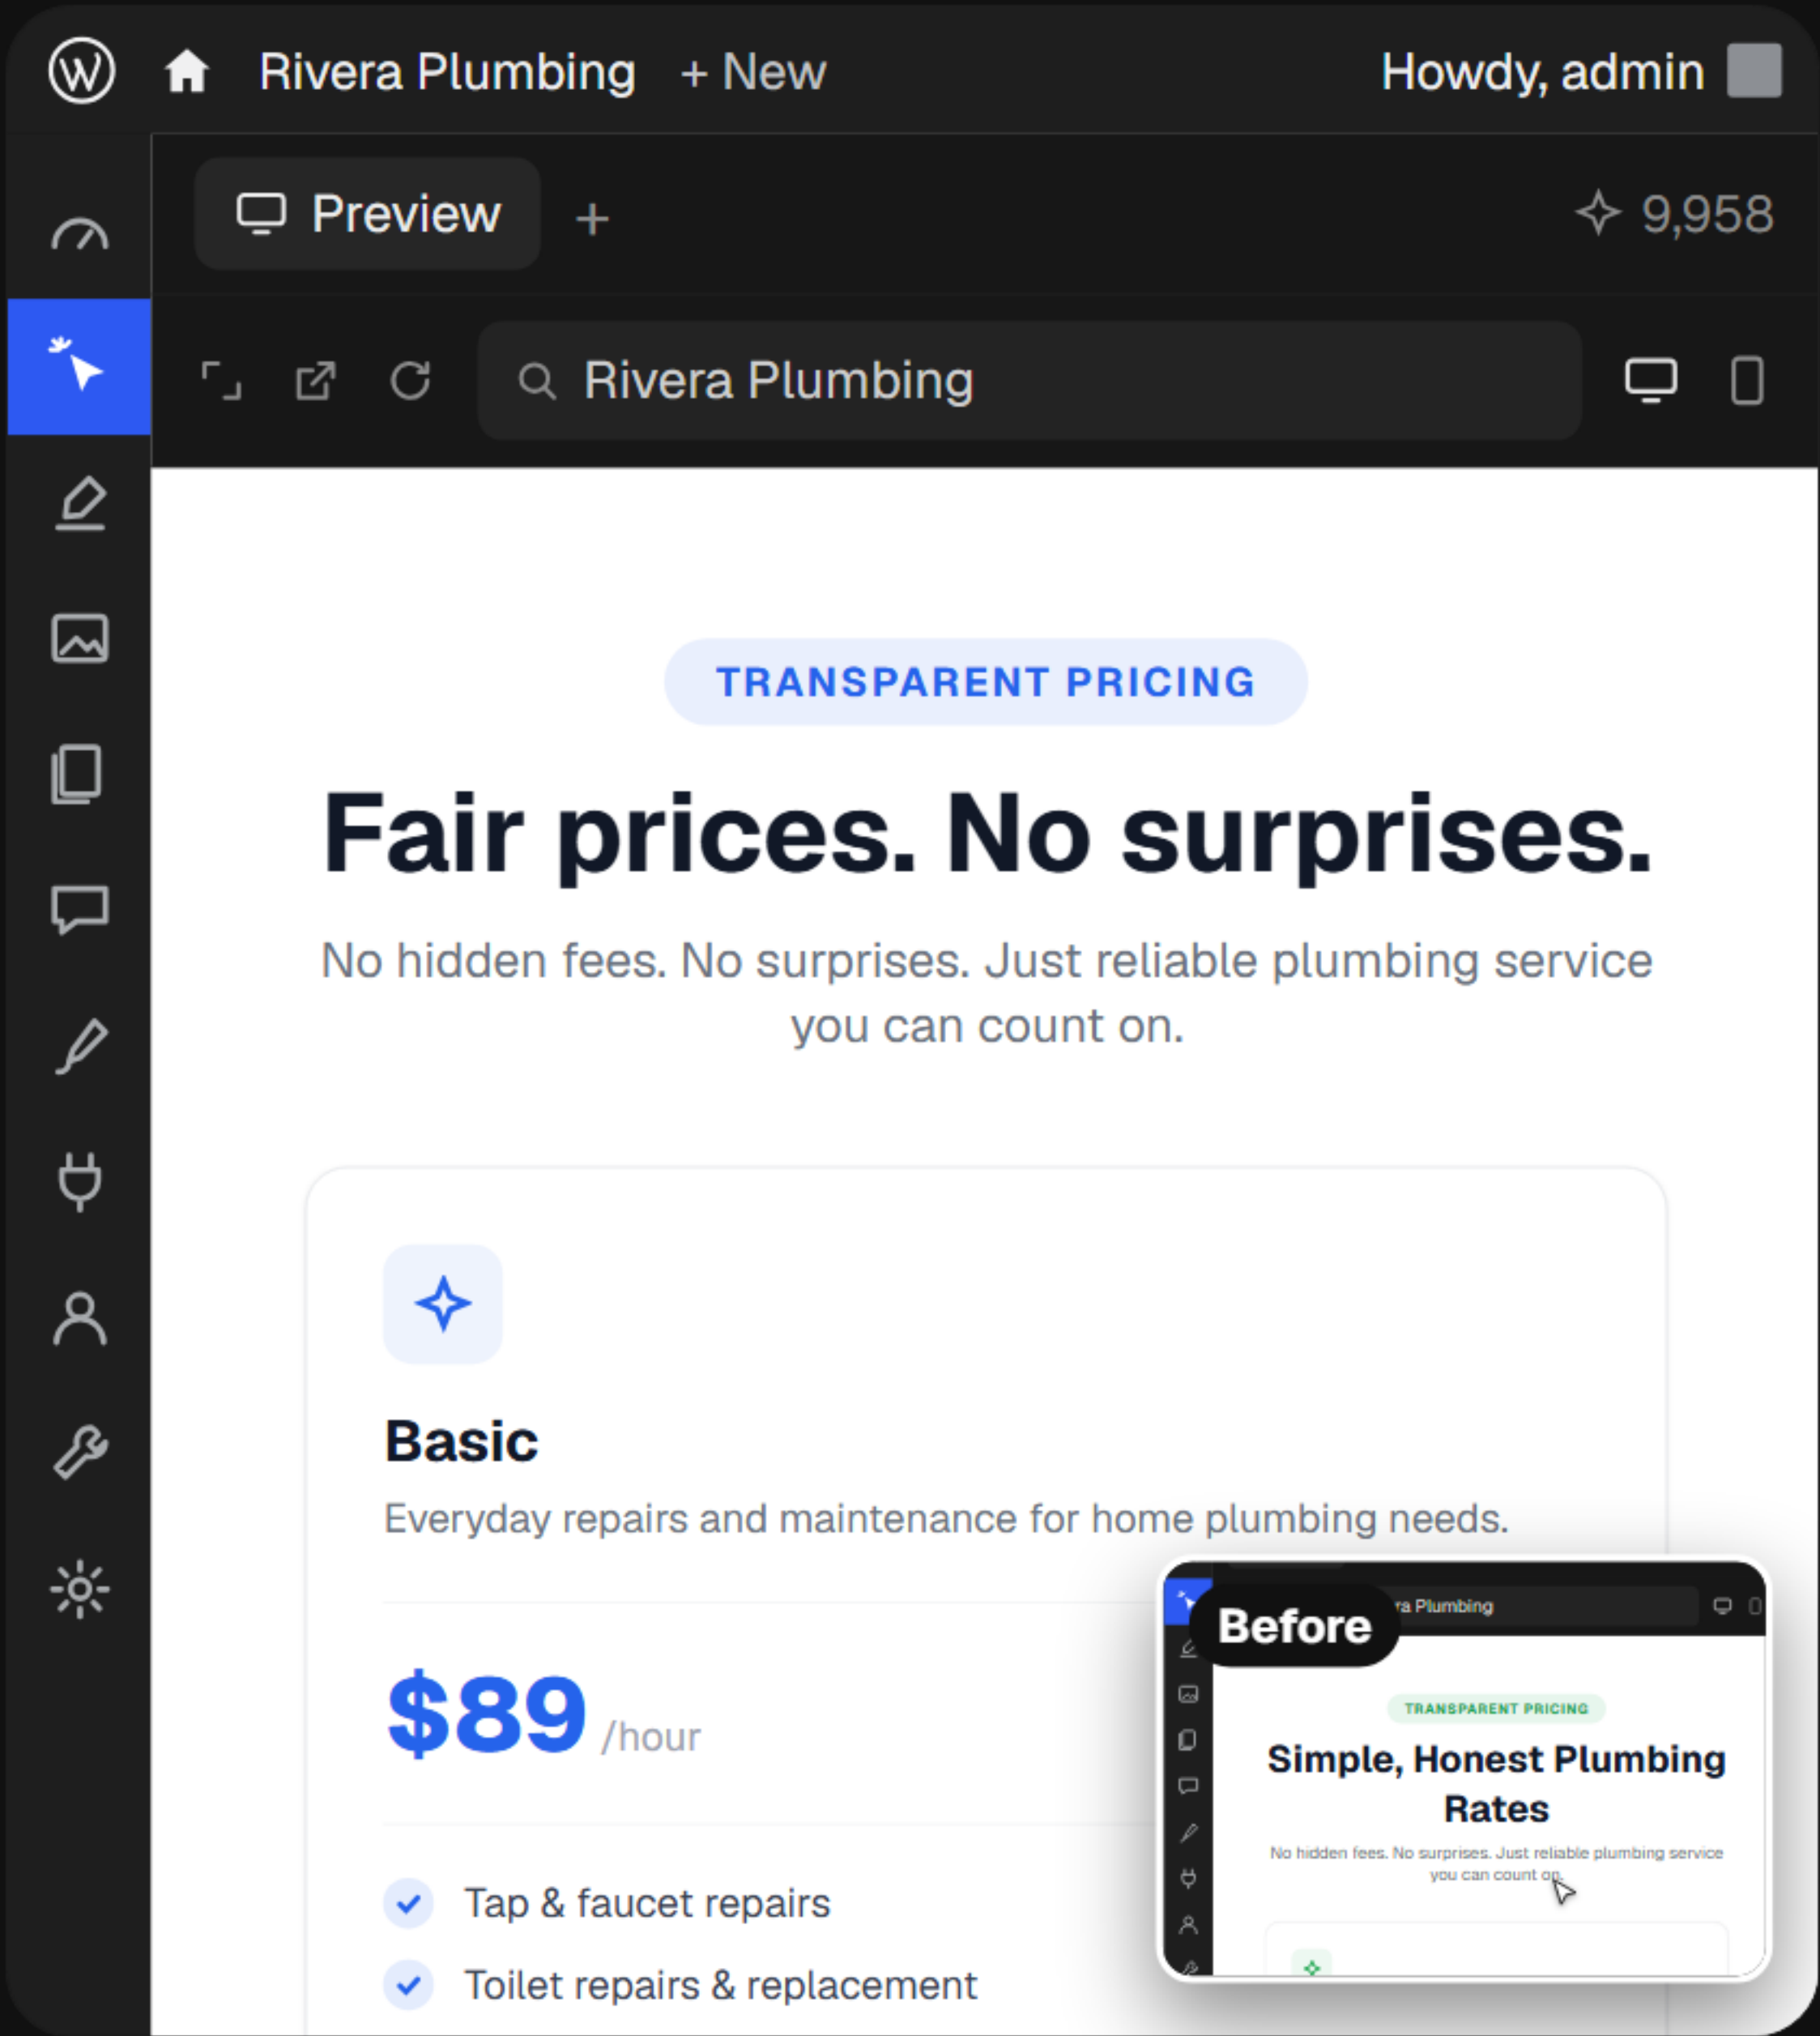

3. It's **live** on your page.

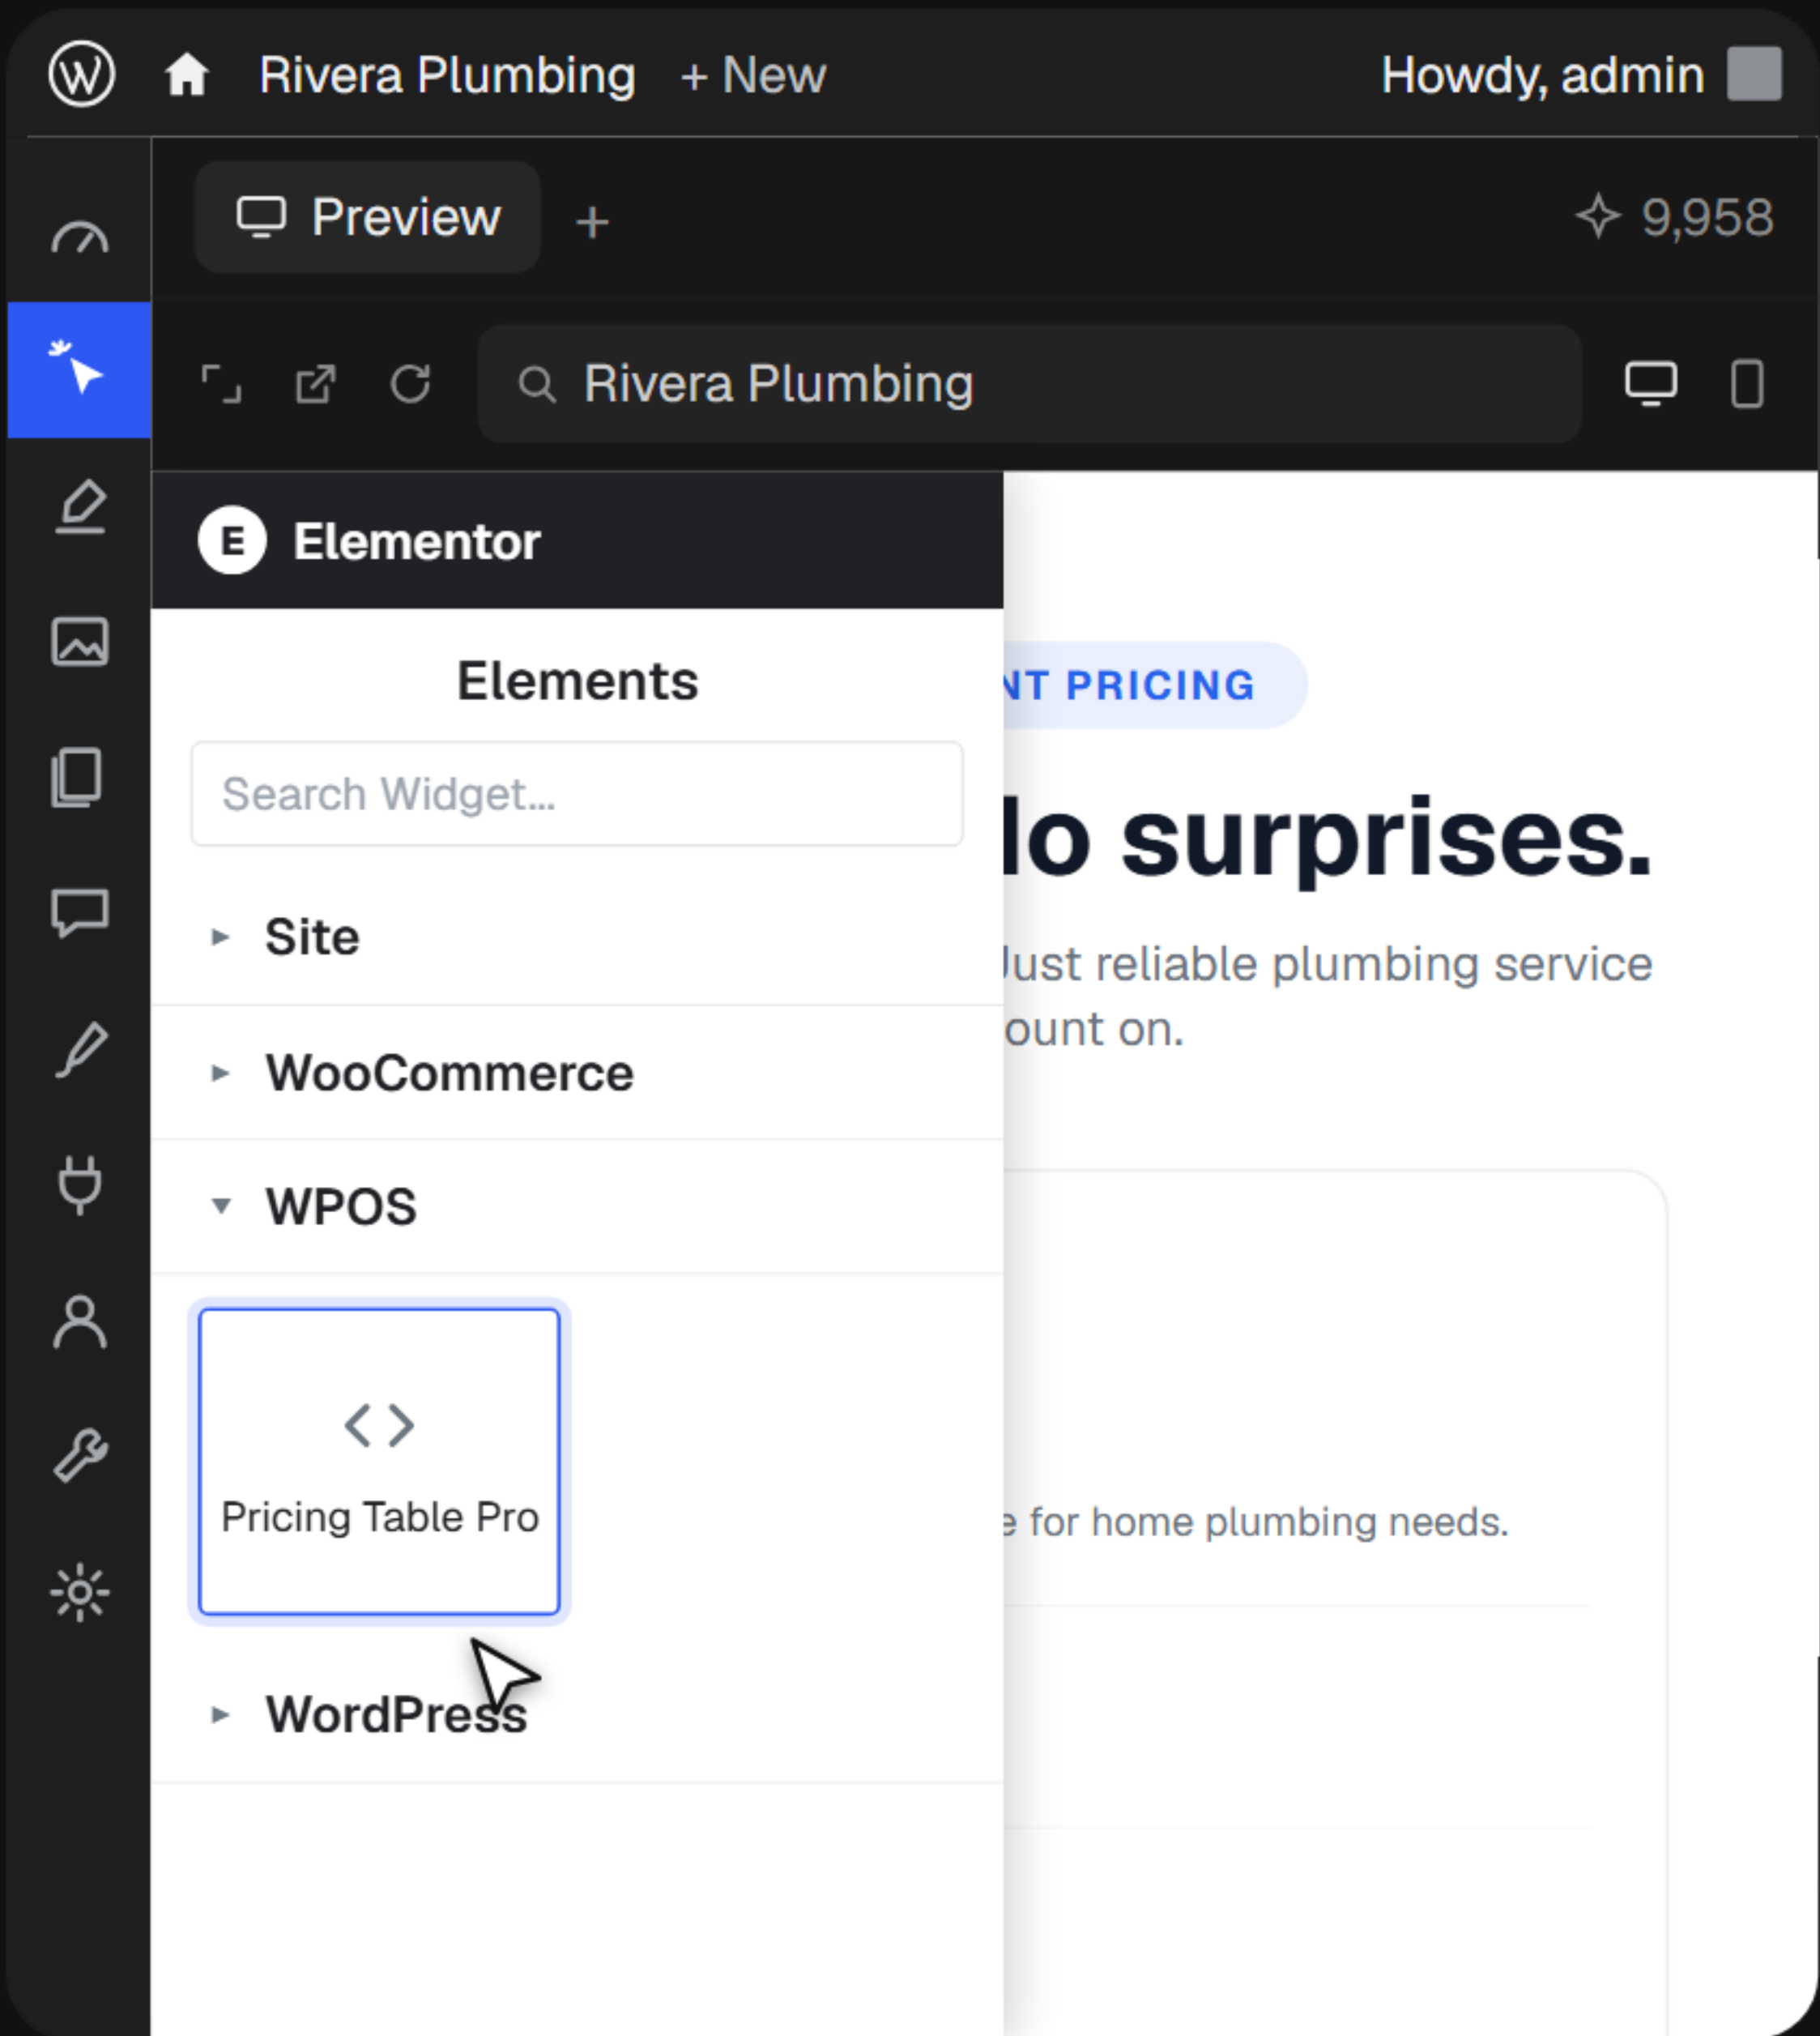

4. Point at anything. Ask for the change.

Changed. Two edits, one message.

Still yours. Still editable in **Elementor**.

What would you ask **WPOS** first?

Ask WPOS to add a booking form to my contact page

Ask WPOS to make the hero match my brand colours

Ask WPOS to turn my FAQ doc into an FAQ section

Tell us in the comments.

Save this for your next client build.
