

Your AI agent can now work inside **WordPress**.

Your AI agent

the assistant you already use

↓ connects through WPOS

WPOS

same tools as the WPOS site agent

↓ works inside

Your WordPress site

pages, Elementor, WooCommerce

New in WPOS: an **AI Agents** tab.

WPOS Command Center

Settings › **AI Agents**

A new tab where an outside assistant can work on your site through WPOS.

v2.7.27 · shipped Sep 22

Hidden on sites in client handoff.

It signs in as a real WordPress user, and can only do what that user **can**.

Agent signed in as: editor

Edit pages

Update Elementor sections

Install plugins

Change site settings

Illustration: the checks follow that user's WordPress role.

Plugins with WordPress abilities are driven **directly**.

Plugins that register WordPress abilities

01 Elementor 4.3 editor abilities

02 Any plugin that registers abilities

WPOS now drives them directly, instead of working around them. Every action still runs as the WordPress user who asked.

Which AI agent would you connect **first**?

The coding agent my team already uses

A custom agent we built in house

None yet, show me more

Tell us in the comments.
