

A whole site, rebuilt in Spanish. 19 pages.

Some products on the old site had no price. What should the AI do?

A. Invent a price that looks right

B. Hide the product until there is one

C. Write "Consultar" (ask us)

Pick one before you swipe.

It wrote "Consultar". And "Próximamente" where products were missing.

- ▶ What WPOS did on the Matura build

- ▢ 0 SKUs or prices invented
- ▢ 19 of 19 pages checked, all returning HTTP 200
- ▢ 3 real bugs caught during the build
- ▢ The shop is not selling yet, and it said so
