

**Before we roast
your WordPress site,
we roasted ours.**

SELF-ROAST • WPOS.AI

**We build WordPress
sites for a living.
So we checked ours.**

Four things we found on wpos.ai today. All true. All a little embarrassing.

Roast #1

ROAST 1/4 · wpos.ai

Our footer forgot Instagram and Facebook.

We post there every day. The footer only links X, LinkedIn and YouTube.

Roast #2

ROAST 2/4 · wpos.ai

Our style guide bans em dashes.

Our homepage has about a dozen of them.

Roast #3

ROAST 3/4 · wpos.ai

Our Slack invite still lives under our old name.

The join link still says wpcursor. We renamed in May.

Roast #4

ROAST 4/4 · wpos.ai

One page still announces our rebrand.

A banner on a partner page still says "WPCursor is now WPOS". We know. We know.

Your turn. What is the most embarrassing thing on **your** site?

A. A forgotten page from 2019

B. A contact form that emails nobody

C. Lorem ipsum, still live

D. Something worse (tell us)

Tell us in the comments.

No judgement. We showed you ours.
