

**This week we broke
our own rules.**

**We roasted our site.
Played bingo.
Picked a fight.
All inside WordPress.**

Monday: we roasted our own **website.**

Monday

SELF-ROAST • WPOS.AI

**We build WordPress
sites for a living.
So we checked ours.**

Four things we found on wpos.ai today. All true. All a little embarrassing.

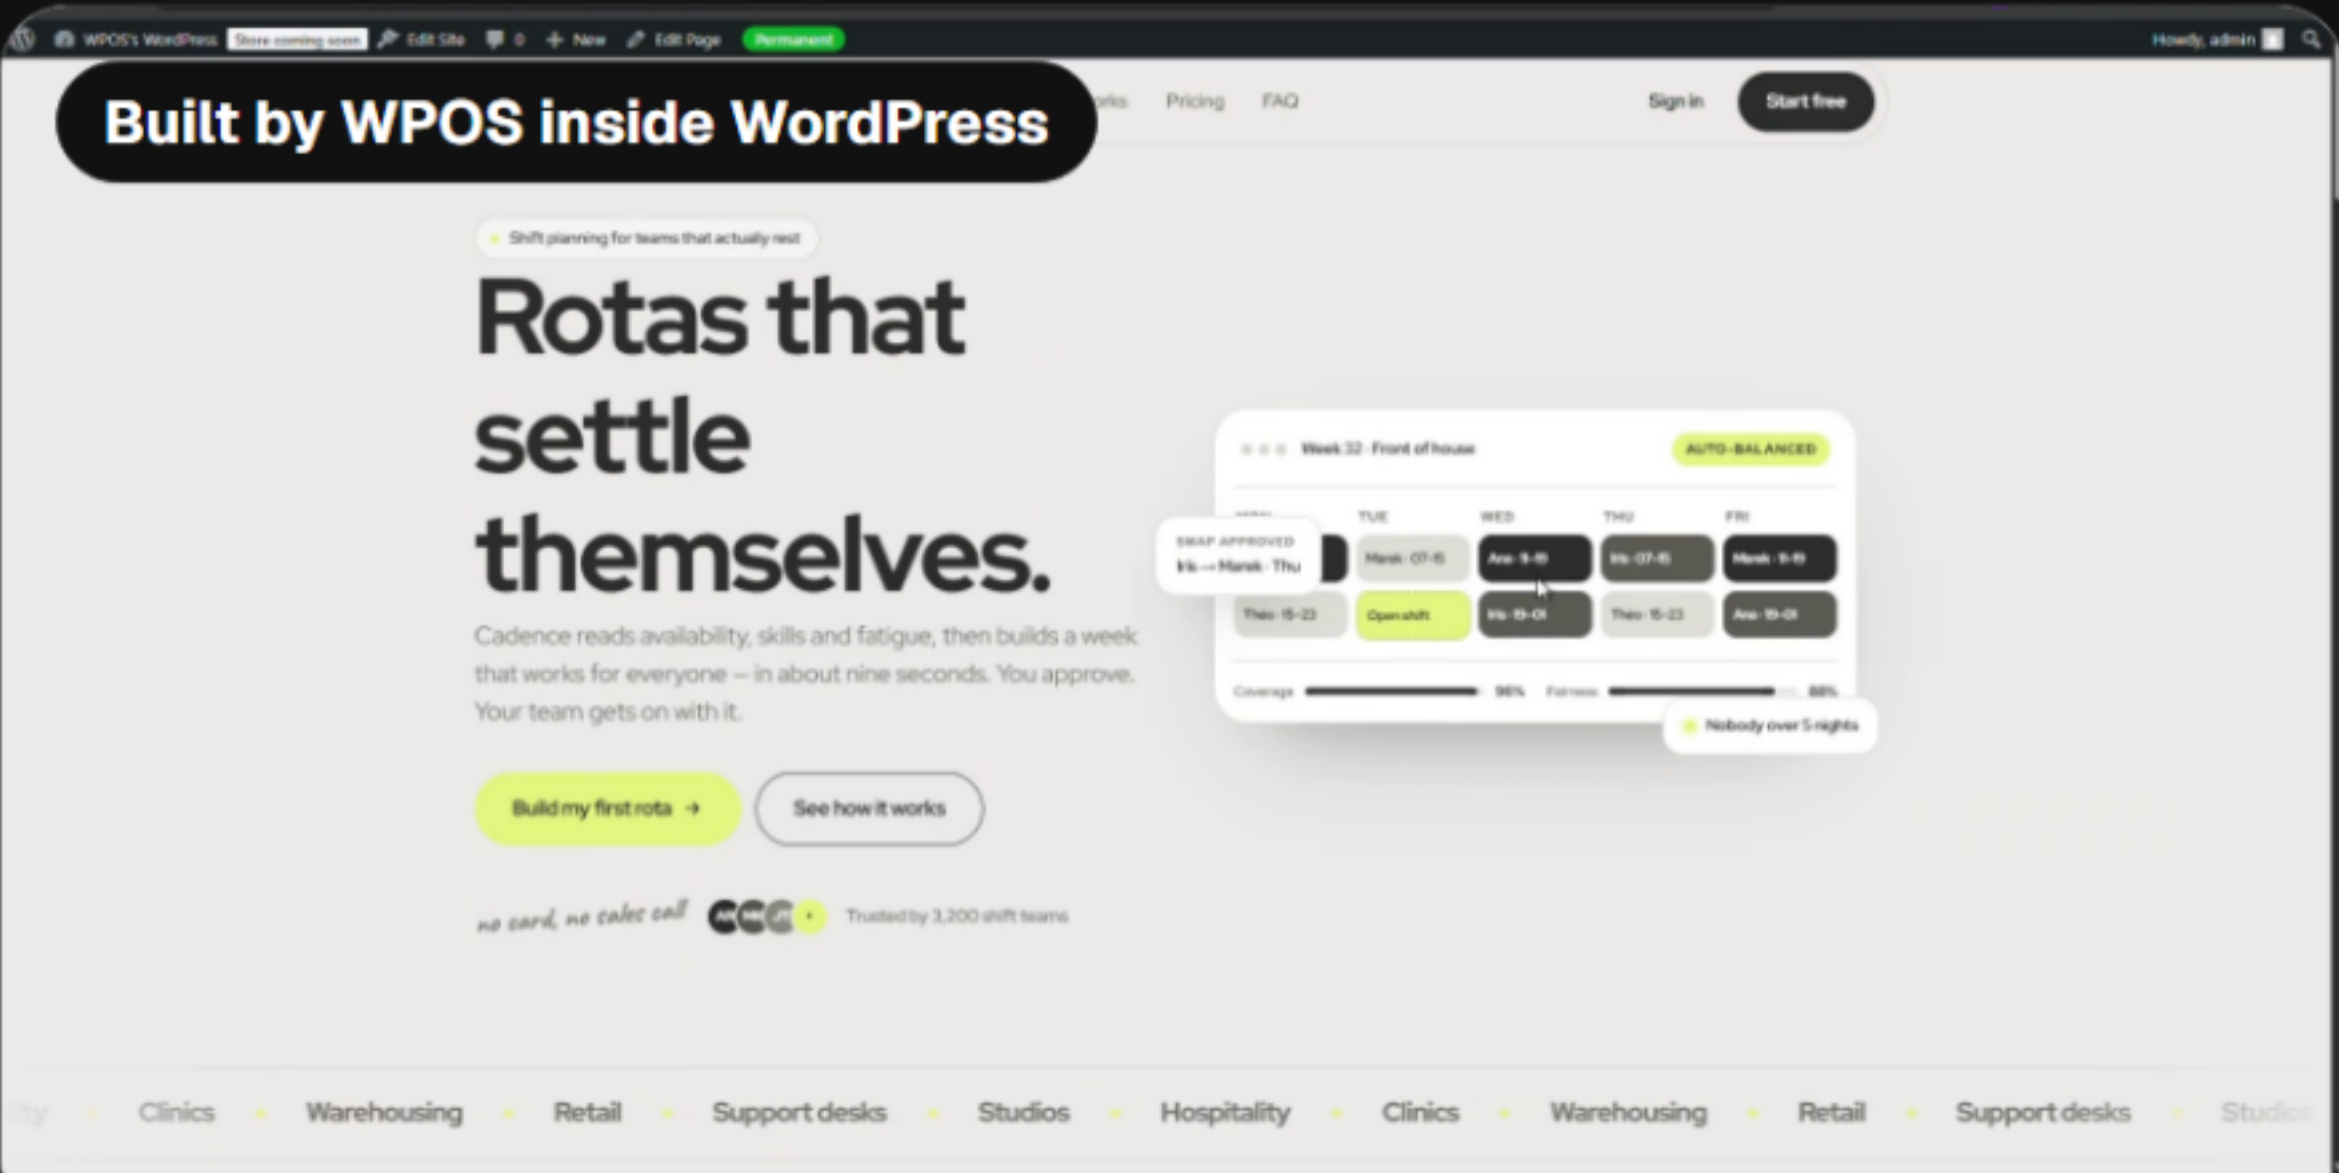

Tuesday: agency client **bingo**.

Tuesday

B	I	N	G	O
"Just a small change"	"Can the logo be bigger?"	"It works on my phone"	"My nephew does websites"	"Can we make it pop?"
"Quick call?" at 4:55 pm	Feedback as a screenshot of a screenshot	"Love it. Can we see 3 more options?"	Content arrives the day before launch	"Why is it slow?" (47 plugins)
"Make it like Apple"	Login details in a WhatsApp voice note	FREE: "Can we hop on a quick call?"	"Can you just move it a bit left?"	Invoice reminder number 3
"Is it mobile friendly?" after launch	"The CEO hates blue"	Brief: "You know, modern"	"Can it go live today?"	Admin password: password123
Scope creep with a smile	"We changed our minds"	"Can you also do our Instagram?"	Comic Sans request	"Can we revert to version 1?"

Wednesday: one line, one landing **page.**

Wednesday

Thursday: your AI builder is a **hostage** situation.

Thursday

HOT TAKE

**Your AI site builder
is a hostage situation.**

Friday: AI agents walked into **Elementor**.

Friday

ELEMENTOR 4.3 · MCP

**Claude Code. Codex.
Cursor. Any MCP tool.
Building inside Elementor.**

Elementor's own MCP page says these tools can now build pages directly in the editor.

Which one should we make a **video** of?

1. The self-roast

2. Agency bingo

3. Guess the prompt

4. The hostage take

5. Agents in Elementor
