

Unpopular opinion
about care plans.

A \$50 care plan
that still eats manual
hours
is a margin sink.

The math nobody puts on the pricing page.

A \$200 plan. 90 minutes of senior dev time a month.

The margin is thin before anything breaks. From our care-plan pricing guide on wpos.ai.

The fix is not a higher price.

- ▶ What actually moves the margin
 - ▢ Drive the labour minutes per site toward zero
 - ▢ Hold or raise the price while the cost to deliver falls
 - ▢ Keep a cheap tier only if it runs almost fully automated

What does your main care plan charge a month?

A. \$50 to \$100

B. \$150 to \$300

C. \$300 or more

D. We don't sell care plans
